

ABOUT NF AIR

NF-AIR is South Korea's first and only water transportation business. In addition to commercial passenger service, NF Air plans to secure government contracts in the fields of monitoring forest fires, monitoring water resources, and general surveying flights.

Cheongpung Lake enjoys gorgeous natural landscapes. Cheongpyeong Lake was created through the construction of a dam. Although the lake views are beautiful enough on their own, most visitors travel to it for watersports. At Cheongpyeong Lake you can water-ski, jet-ski, banana boat, knee-board, and more. Through the use of Cheongpung

Lake along with the Geumsusan, Worak, Sobaek, and Chiaksan waterways, NF Air plans to bring global tourism to Cheongpung Lake and other shore cities in South Korea through its air transportation business.

NF Air plans to use the Cessna 208B EX Amphibian to offer pleasant and safe sightseeing flights. In addition, NF Air intends to expand its air tourism and charter flights at Cheongpung Lake into a nationwide operation. This will be done through the efficient utilization of the abundant water resources of the Republic of Korea. This operation will contribute to vitalization of local economies and tourism.
